PAVEL GOLDIN

Lead Frontend Developer & Team Lead | 4+ Years Experience

Target Location: Dubai & Abu Dhabi, UAE (Open to On-site, Hybrid & Remote) | Current: Moscow, Russia
Phone: +7 (925) 741-89-32 | Email: goldiii.dev@gmail.com | LinkedIn: linkedin.com/in/pavel-goldin-dev | GitHub: github.com/Goldiii-sudo | Telegram: @itsbanana2

UAE / Gulf Availability: Nationality: Russian | Visa Status: Requires UAE Employment Visa Sponsorship (Immediate Processing) | Notice Period: Immediate (0 Days) | Relocation: Immediate (1-2 Weeks)

PROFESSIONAL SUMMARY

Results-driven Lead Frontend Developer and Team Lead with 4+ years of experience delivering scalable enterprise web applications, high-throughput SPAs, and SSR systems using Angular and TypeScript. Proven track record leading agile frontend engineering teams, defining software architecture, mentoring developers, and maintaining hands-on code delivery. Experienced in building international, multi-currency applications compliant with GCC / MENA regional requirements. Expert in reactive state management (Signals, RxJS, NgRx), automated testing (Jest, Cypress), CI/CD pipelines, and web performance optimization.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), Angular (v14-v18+, Standalone, Signals, Zoneless, Control Flow, SSR/Hydration), RxJS, HTML5, CSS3, SCSS

State Management & Architecture: NgRx (Store, Effects, Entity), Akita, Signal-based Stores, Reactive Services, Micro-frontends, Modular Architecture

UI Libraries & Styling: Tailwind CSS, Angular Material, PrimeNG, Responsive Design, Pixel-Perfect UI, Cross-Browser Compatibility, RTL/i18n Readiness

Testing & Quality Assurance: Jest, Cypress (E2E), Jasmine, Karma, Code Review, Performance Auditing (Lighthouse, Chrome DevTools)

Tools, APIs & DevOps: RESTful APIs, GraphQL (Apollo), WebSockets, Angular CLI, Webpack, Vite, Git, GitHub Actions, GitLab CI/CD, Docker

WORK EXPERIENCE

TechFlow Solutions - Lead Frontend Developer / Team Lead **10/2023 - Present | Remote (UAE / International Projects)**

Stack: Angular 17/18, TypeScript, RxJS, Signals, NgRx, Tailwind CSS, Jest, WebSockets, GitLab CI

- Led and scaled a distributed team of frontend developers: planned 2-week sprints, assigned epics, conducted technical code reviews, and enforced engineering standards.
- Spearheaded hands-on architectural migration from Angular 12 legacy codebase to Angular 17+ with Standalone Components and Signals, reducing boilerplate by 30%.
- Mentored junior engineers through daily pair programming and structured code reviews while collaborating with senior backend architects to align REST/WebSocket contracts.
- Optimized bundle size and Core Web Vitals, achieving a 40% reduction in initial bundle weight and decreasing page load times from 3.2s to 1.1s.
- Architected end-to-end automated testing strategy with Jest, increasing test coverage from 15% to 75% and decreasing regression incidents by 65%.

WebCraft Studio - Frontend Developer **06/2022 - 09/2023 | Remote**

Stack: Angular 14/15, TypeScript, RxJS, Angular Material, SCSS, REST API, Jest, Git

- Developed reusable UI component libraries and responsive single-page web applications from Figma prototypes with 100% pixel-perfect fidelity.
- Integrated secure REST APIs, implemented JWT-based authentication flows, and authored robust HTTP interceptors for global error handling and retry policies.
- Actively participated in Agile Scrum ceremonies (sprint planning, daily stand-ups, backlog grooming, and retrospectives).

KEY PROJECTS

Batumi & Gulf Real Estate Marketplace | github.com/Goldiii-sudo/batumi-real-estate **01/2024 - 04/2024**

Stack: Angular 17, Signals, TypeScript, Tailwind CSS, Mapbox API, REST API

- Architected and delivered an international real estate platform for property sales targeted at GCC and UAE cross-border investors within an accelerated 3-month timeline.
- Implemented multi-currency pricing (AED, USD, EUR), dynamic multi-criteria filtering with URL state persistence, and interactive GIS mapping, improving conversion by 28%.

Logistics & Fleet Management CRM System | github.com/Goldiii-sudo/crm-logistics **08/2023 - 12/2023**

Stack: Angular 17, NgRx, TypeScript, Tailwind CSS, WebSockets, NestJS

- Designed high-performance B2B logistics dashboard with NgRx state management and virtual scrolling for data grids handling 10,000+ live fleet records (4x rendering speedup).
- Integrated real-time bidirectional WebSocket channels for instantaneous telemetry updates and cross-border trade route tracking.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science & Software Engineering **2016 - 2020**

MIREA - Russian Technological University | Moscow, Russia

Postgraduate Certificate in Advanced Web Architecture & Systems **2020 - 2021**

California Institute of Technology & Computer Science Online | Palo Alto, CA, USA (Distance Learning)

Professional Certifications **2022 - 2024**

Rolling Scopes School (RS School) Angular & TypeScript (Top 10% Graduate) | Angular University NgRx & Signals Masterclass
