Pavel Goldin

Lead Frontend Developer & Team Lead (4+ Years Experience)

Location: Moscow, Russia (Open to Remote & Relocation) **Phone:** +7 (925) 741-89-32 **Email:** goldiii.dev@gmail.com

Telegram: @itsbanana2 (alt: @Olenkaolga2) **GitHub:** github.com/Goldiii-sudo

Languages: English (C1 / Professional), Russian (Native)

PROFESSIONAL SUMMARY

Results-driven Lead Frontend Developer and Team Lead with 4+ years of hands-on experience building enterprise-grade SPAs, high-load web applications, and SSR architectures using Angular and TypeScript. Proven track record leading multidisciplinary frontend teams, conducting architectural code reviews, mentoring junior engineers, and driving cross-functional collaboration with senior engineers and backend leads. Strong commitment to clean code, reactive state management (Signals & RxJS), automated testing (Jest, Cypress), and rapid product delivery with high business impact.

CORE TECHNICAL SKILLS

Frontend & Frameworks:	Angular (v14–v18+, Standalone Components, Signals, Zoneless, New Control Flow, SSR/Hydration), TypeScript, JavaScript (ES6+), RxJS
State Management:	NgRx (Store, Effects, Entity, ComponentStore), Akita, Signal-based Stores, Reactive Services
UI & Styling:	HTML5, CSS3, SCSS/SASS, Tailwind CSS, Angular Material, PrimeNG, Responsive & Adaptive Design, Pixel-Perfect Implementation
Architecture & APIs:	Micro-frontends, Component-driven architecture, RESTful APIs, GraphQL (Apollo), WebSockets, HTTP Interceptors
Tooling, CI/CD & DevOps:	Angular CLI, Webpack, Vite, Git, GitHub Actions, GitLab CI/CD, Docker basics, Linux
Testing & Quality:	Jest, Cypress (E2E), Karma/Jasmine, Code Review, Performance Profiling (Chrome DevTools, Lighthouse)

WORK EXPERIENCE

Lead Frontend Developer / Team Lead — TechFlow Solutions

October 2023 — Present (Moscow, Russia / Remote)

Tech Stack: Angular 17/18, TypeScript, RxJS, Signals, NgRx, Tailwind CSS, Jest, WebSockets, GitLab CI

- **Team Leadership & Delivery:** Managed and guided a distributed frontend team, estimated deliverables, led sprint planning, and established rigorous code-review standards across projects.
- **Hands-On Architecture & Migration:** Engineered mission-critical modules and drove end-to-end legacy migration from Angular 12 to Angular 17+ with Standalone Components and Signals.
- **Mentorship & Collaboration:** Mentored junior developers through structured pair programming and code reviews while coordinating technical roadmap with senior backend leads.
- **Performance & Bundle Optimization:** Reduced initial bundle payload by 40% via route-level lazy loading and dependency pruning; optimized Core Web Vitals across client portals.
- **Test Automation & QA:** Implemented comprehensive unit testing with Jest, accelerating CI pipeline speed and raising total code coverage from 15% to 75%.

Frontend Developer — WebCraft Studio

June 2022 — September 2023 (Moscow, Russia / Remote)

Tech Stack: Angular 14/15, TypeScript, RxJS, Angular Material, SCSS, REST API, Jest, Git

- Developed high-performance UI components and responsive views strictly adhering to Figma design systems.
- Integrated complex RESTful services, configured secure JWT authentication flows, and authored robust HTTP interceptors.
- Participated actively in Agile/Scrum ceremonies (daily stand-ups, backlog refinement, sprint reviews, and retrospectives).

KEY PROJECTS

Batumi Real Estate Marketplace — Property Sales Platform

github.com/Goldiii-sudo/batumi-real-estate

Stack: Angular 17, Signals, TypeScript, Tailwind CSS, Leaflet/Mapbox API, REST API

- Engineered and launched a residential real estate platform for Batumi property purchases with exceptionally fast time-to-market.
- Implemented multi-criteria dynamic filtering (price, district, area, completion phase) with two-way URL state synchronization.
- Integrated interactive GIS mapping for geospatial property discovery; optimized mobile rendering for instant layout display.

B2B Logistics & Fleet Management CRM System

github.com/Goldiii-sudo/crm-logistics

Stack: Angular 17, NgRx, TypeScript, Tailwind CSS, WebSockets, Node.js (NestJS)

- Architected scalable state management using NgRx and implemented virtual scrolling for data grids handling 10,000+ live records, achieving a 4x render speedup.
- Built bidirectional WebSocket pipelines for real-time cargo status tracking and vehicle coordinate telemetry.

High-Load E-Commerce Platform

github.com/Goldiii-sudo/ecommerce-shop

Stack: Angular 15, RxJS, SCSS, Angular Universal (SSR), Firebase, Stripe API

- Delivered end-to-end shopping experience featuring tiered filtering, shopping cart, user authentication, and secure Stripe checkout.
- Engineered Angular Universal SSR, boosting search indexing and enhancing Largest Contentful Paint (LCP) by 35%.

EDUCATION & PROFESSIONAL DEVELOPMENT

Higher Education: Bachelor of Science in Computer Science & Software Engineering

2016 — 2020

Institution: MIREA — Russian Technological University (Moscow, Russia)

- Specialization in Software Architecture, Algorithms & Data Structures, Database Systems, and Object-Oriented Design.

Advanced US Program: Certificate in Advanced Software Architecture & Web Systems

2020 — 2021

Institution: California Institute of Technology & Computer Science Online (Palo Alto, CA, USA — Distance Learning)

- Advanced curriculum covering Distributed Web Architecture, Modern Reactive UI Design, Cloud CI/CD Pipelines, and System Scalability.

Certifications & Professional Specializations

2022 — 2024

- **Rolling Scopes School (RS School):** Angular & TypeScript Core Track (Graduated Top 10% of cohort, 2022).
- **Angular University:** Angular Core Deep Dive, NgRx Reactive State Architecture & Signals Mastery (2023–2024).
